PROFESSIONAL LOCKOUT SERVICES

Master Lock Professional Lockout Services has the expert guidance and industry-leading experience to help facilities meet their safety goals.

Building the Lockout Management System Tailored for Each Facility

Master Lock Professional Lockout Services can take a holistic approach to build a customized, best-in-class lockout management system or focus on the select elements that will make significant improvements in a facility's safety program.

ASSESSMENT

Our safety experts conduct in-depth, on-site assessments to evaluate the current state of a lockout tagout program and identify methods of improvement. The recommendations from the assessment can be used to design a best-in-class lockout/tagout program that achieves heightened safety, practicality and efficiency for personnel.

Some of the on-site assessments include:

- Alternative Methods to Lockout — Keep workers safe, when full lockout is not practical
- Confined Space Hazards — Pre-plan for confined space entries
- Machine Guarding — Establish frontline protection to keep employees safe
- Rapid Access to Lockout Equipment — Minimize wasted time by maximizing access to lockout equipment

WRITTEN PROGRAM

A team of safety consultants will develop a company-wide written lockout program that takes an efficient approach to meet and exceed compliance requirements.

WRITTEN PROCEDURES

Our technicians complete an in-depth analysis of equipment and energy sources to create detailed lockout isolation procedures.

TIERED TRAINING

We empower organizations to create a safer work environment. Achieving a compliant lockout management system requires ongoing training. Our safety certified staff will come on-site and lead all or any of the hands-on courses requested. We offer the following training courses:

- Authorized Personnel
- Affected Personnel
- Lockout Procedure Creation
- Lockout Practitioner Certification
- Lockout Leadership
- Alternative Methods to Lockout
- Confined Space Hazards
- Rapid Access to Lockout Equipment

PROPER EQUIPMENT

Our safety experts can provide recommendations on the necessary safety padlocks, lockout devices, and identification tags for a best-in-class lockout management system.

ACCESS

Experience has shown it should take less than 15 seconds to access lockout equipment. Keeping the necessary equipment close and easily accessible by authorized personnel saves time, eliminates excuses, and helps prevent damages and injuries. We provide the assessment and training to improve access to lockout equipment within a facility.

AUDITS

Our safety experts offer on-site review of lockout procedures and programs to help ensure compliance requirements are met. We deliver a summary report which includes best-practice recommendations and corrective actions.

Estimates for services will be provided once the scope of work has been identified.

REDUCE. REUSE. RECYCLE.

Master Lock is proud to do all three

PROTECTING PEOPLE AND THE PLANET:

Our Master Lock Safety padlocks use FDA compliant lubricants, which are safe for use in food processing facilities.

Additionally, Master Lock manufactures the majority of Safety padlock components in our ISO 9001 North American facilities.

Master Lock is committed to stewardship of the environment, to the people who make and use our safety products, and to the communities where they are made and used.

A NUMBER OF MASTER LOCK PRODUCTS HAVE BEEN UL ENVIRONMENT VERIFIED FOR RECYCLED CONTENT.

UL Environment works to advance global sustainability by supporting the growth and development of environmentally preferable products, services and organizations.

REDUCE

Our Master Lock Safety Zenex™ padlock bodies are molded using a hot runner injection molding process that results in virtually no scrap material.

REUSE

Precision engineering, durable materials and recommended padlock maintenance ensure all Master Lock Safety padlocks are long lasting.

RECYCLE

Master Lock Safety padlocks use a significant percentage of recycled metal. Steel shackles, brass keys and cylinders, as well as our aluminum lock bodies are all manufactured using recycled material.

Our customer services and key management systems build better safety programs.
